

I'm so tired of hearing about the telemarketers rights. The Do Not Call list is the best thing that has ever happened to people that simply do not want to be disturbed by annoying phone calls. Since I have signed up, my amount of calls has dropped from nearly 5-7 per day to about 1-2 per week, and they are always from someone I already have a business relationship with. Please do not overturn this law. Don't you understand that this is what people want?
